9 October 2018

Ethiopian Teachers Association, as a member of Education International, celebrates the Day by organizing events. It was celebrated in collaboration with Wolaita-Sodo University and the university’s Teachers’ Association and other development partners in the university’s main campus from 6-7 Oct. 2018 by organizing research conference.

On the occasion, 13 research papers of high concern on quality education across education levels were presented and discussed by the conference participants.

This year’s celebration was unique in that the Education Road Map drafted by the FDRE Ministry of Education, which is expected to serve for the coming 15 years, was a center of discussion.

In the discussion, among other things, ETA in leadership raised a question for the establishment of Teachers' Service Commission. ETA wishes the commission to be an independent governmental body which governs the teaching personnel from recruitment to retirement.

In the end, the conference was concluded by recognizing teacher of the year. In her overall activity, Miss Kebebushe Tsige, a Chemistry teacher from Addis Ababa Atse Tewodros Kindergarten and primary school received her award from Mr. Yohannes Benti, President of ETA, in a marvelous ceremony.
ETA would like to thank Ministry of Education and Wolaita-Sodo University for their support for the conference to be successful.
